

Fact Sheet

What Is the Air Quality Flag Program?

The Flag Program uses brightly colored flags based on the U.S. EPA's Air Quality Index (AQI) to notify people and their communities about outdoor air quality conditions. Organizations raise a flag each day that corresponds to their local air quality forecast.

Why Is the Flag Program Important?

The Flag Program creates public awareness of outdoor air quality conditions. People can continue to get plenty of physical activity, while still protecting their health from poor air quality. When air quality is unhealthy, people can modify their activities, or move them inside. Recommendations for outdoor activities on poor air quality days can be found at www.airnow.gov/flag.

What Is the Air Quality Index?

The Air Quality Index is a guide for reporting daily air quality. It uses colors and numbers to show how clean or polluted the air is. EPA uses the Air Quality Index to report ground-level ozone and particle pollution. For each pollutant, EPA has established national standards to protect people's health.

What Do The Colors Mean?

The Flag Program uses green, yellow, orange, red and purple flags. These colors correspond to the Air Quality Index.

Green means air quality is good.

Yellow means air quality is moderate.

Orange means air quality is unhealthy for sensitive groups -- people with heart disease or lung disease such as asthma, children & teens, people who are active outdoors, and older adults.

Red means air quality is unhealthy.

Purple means air quality is very unhealthy.

How Will I Know What Color Flag To Use?

Check the AQI at www.epa.gov/airnow. Sign up for emails (www.airnow.gov/enviroflash), download the AirNow app, or install the AirNow widget on your website.
